Education

The College of Wooster

May 2025

B.A. in Computer Science and Mathematics

Dean's List, 4.0 GPA

Courses: Data structures and Algorithms, Databases, Comp Networking, Algo Analysis, Theory of Comp, Lin Algebra, Adv Math Transition, Multivar Calc, Prob Theory, Stat Theory, Applied Stats

Skills

- Programming Languages: C++, Python, JavaScript, R
- Web development: HTML, CSS, Bootstrap, React.js, Node.js, MongoDB
- Other: LaTeX, UNIX, Git, Korean, Japanese, English

Experiences

AI Solutions Intern

Jan 2024 - Feb 2024

Matsuo Institute

Remote

- Conducted PoC thorough industry investigation, analyzing possible competitors and customers
- Contributed to MVP development by researching 10+ relevant papers for best practice alignment
- Developed MVP by creating 100+ Lo-Fi MVPs and conducting AB test using fine-tuned llm

Math Research Assistant

Jan 2024 - present

The College of Wooster

Wooster, OH

- Researched perturbation theory by reviewing papers on probabilistic and stochastic phenomena
- Computed perturbations of various mathematical objects

CS Research Assistant

Jan 2024 - present

The College of Wooster

Wooster, OH

- Developed large language model for finance by fine-tuning llama-2 in python with transformers
- Acquired recent financial data by web scraping in BeautifulSoup

Projects

Browser-based Circle Game HTML, CSS, JavaScript

- Place and grow circles while avoiding collisions with the canvas edges or other circles
- Manage game interactions by utilizing event listeners for keyboard and mouse inputs
- Save the high score across session by storing game score locally in localStroage

Task Manager React

- A frontend website capable of adding, editing, deleting, and sorting tasks
- Managed state of the tasks within application using Redux to handle complex state changes
- Added drag and drop functionality to reorder tasks using the react-beautiful-dnd library

Full-stack QA webapp React, Node.js, MongoDB

- Enables users to post and see answers to random questions from other users
- Designed DB schema, managed data via Express.js and MongoDB RESTful API
- Users are authenticated using bcrypt for password encryption and jsonwebtoken for secure access

Full-stack BookStore webapp React, Node.js, MongoDB, Bootstrap

- Users can explore and save books to their personal library, and view details about each book
- Manage user requests and data with a RESTful API using Express.js and MongoDB
- Authenticates users with bcrypt for password encryption and jsonwebtoken for secure access

Activities

Competitive Programming

Aug 2020 - present

- 18th in PC koushien Qualifiers 2020(UoAizu)
- 4th in Supercomputing Contest 2021(Tokyo Tech)
- 4th in Denison Programming Contest 2024(Denison)
